METHODS AND STANDARDS FOR ESTABLISHING PAYMENT RATES – NURSING FACILITY SERVICES

For payments made for services provided on or after March 29, 2001, subject to the availability of funds in the year in which the interim and final rate is paid, State government-owned or operated facilities and non-State government owned or operated facilities will be eligible for rate payment adjustments. The rate adjustment payments are intended to provide supplemental funding for Medicaid services to these facilities that, based on their status as government owned or operated, need sufficient funds for their commitments to meet the healthcare needs of all members of their communities. A facility's status as government owned or operated will be based on its ability to make direct or indirect intergovernmental transfer payments to the State. If sufficient funds are not available to provide maximum allowable payment amounts, rate adjustment payments may be reduced proportionally among facilities eligible to receive payment.

The rate payment adjustments will be subject to federal upper payment limits. For the appropriate groupings of State government-owned or operated facilities, non-State government owned or operated facilities and all other facilities, aggregate rate adjustment payments available without exceeding upper payment limits will be determined by measuring the difference between:

- Amounts paid for services provided to Medicaid patients and
- Estimated payment amounts for such services if payments were based on Medicare payment principles. Either cost based or rate payment measures may be used as Medicare payment principles.

Comparisons of amounts paid for services provided to Medicaid patients and estimated payment amounts for such services if payments were based on Medicare payment principles will also be made for each facility to determine facility-specific rate adjustment payments. These rate payment adjustments will be made on a monthly, quarterly or annual basis and will be determined in a manner that will not duplicate compensation provided from payments for individual patient claims.

An example of how a rate adjustment payment could be calculated is presented on the following page.
